## RealTime Conversation Enhancement

# The science of keeping up with conversations

Signia Integrated Xperience's revolutionary RealTime Conversation Enhancement analyzes, augments, and adapts to the dynamic flow of conversations. This lets wearers enjoy a seamless and enriched hearing experience.

### Analyze

Processes 192,000 data points every second to identify speakers and analyze conversation dynamics, authentically reflecting real-life conversations.

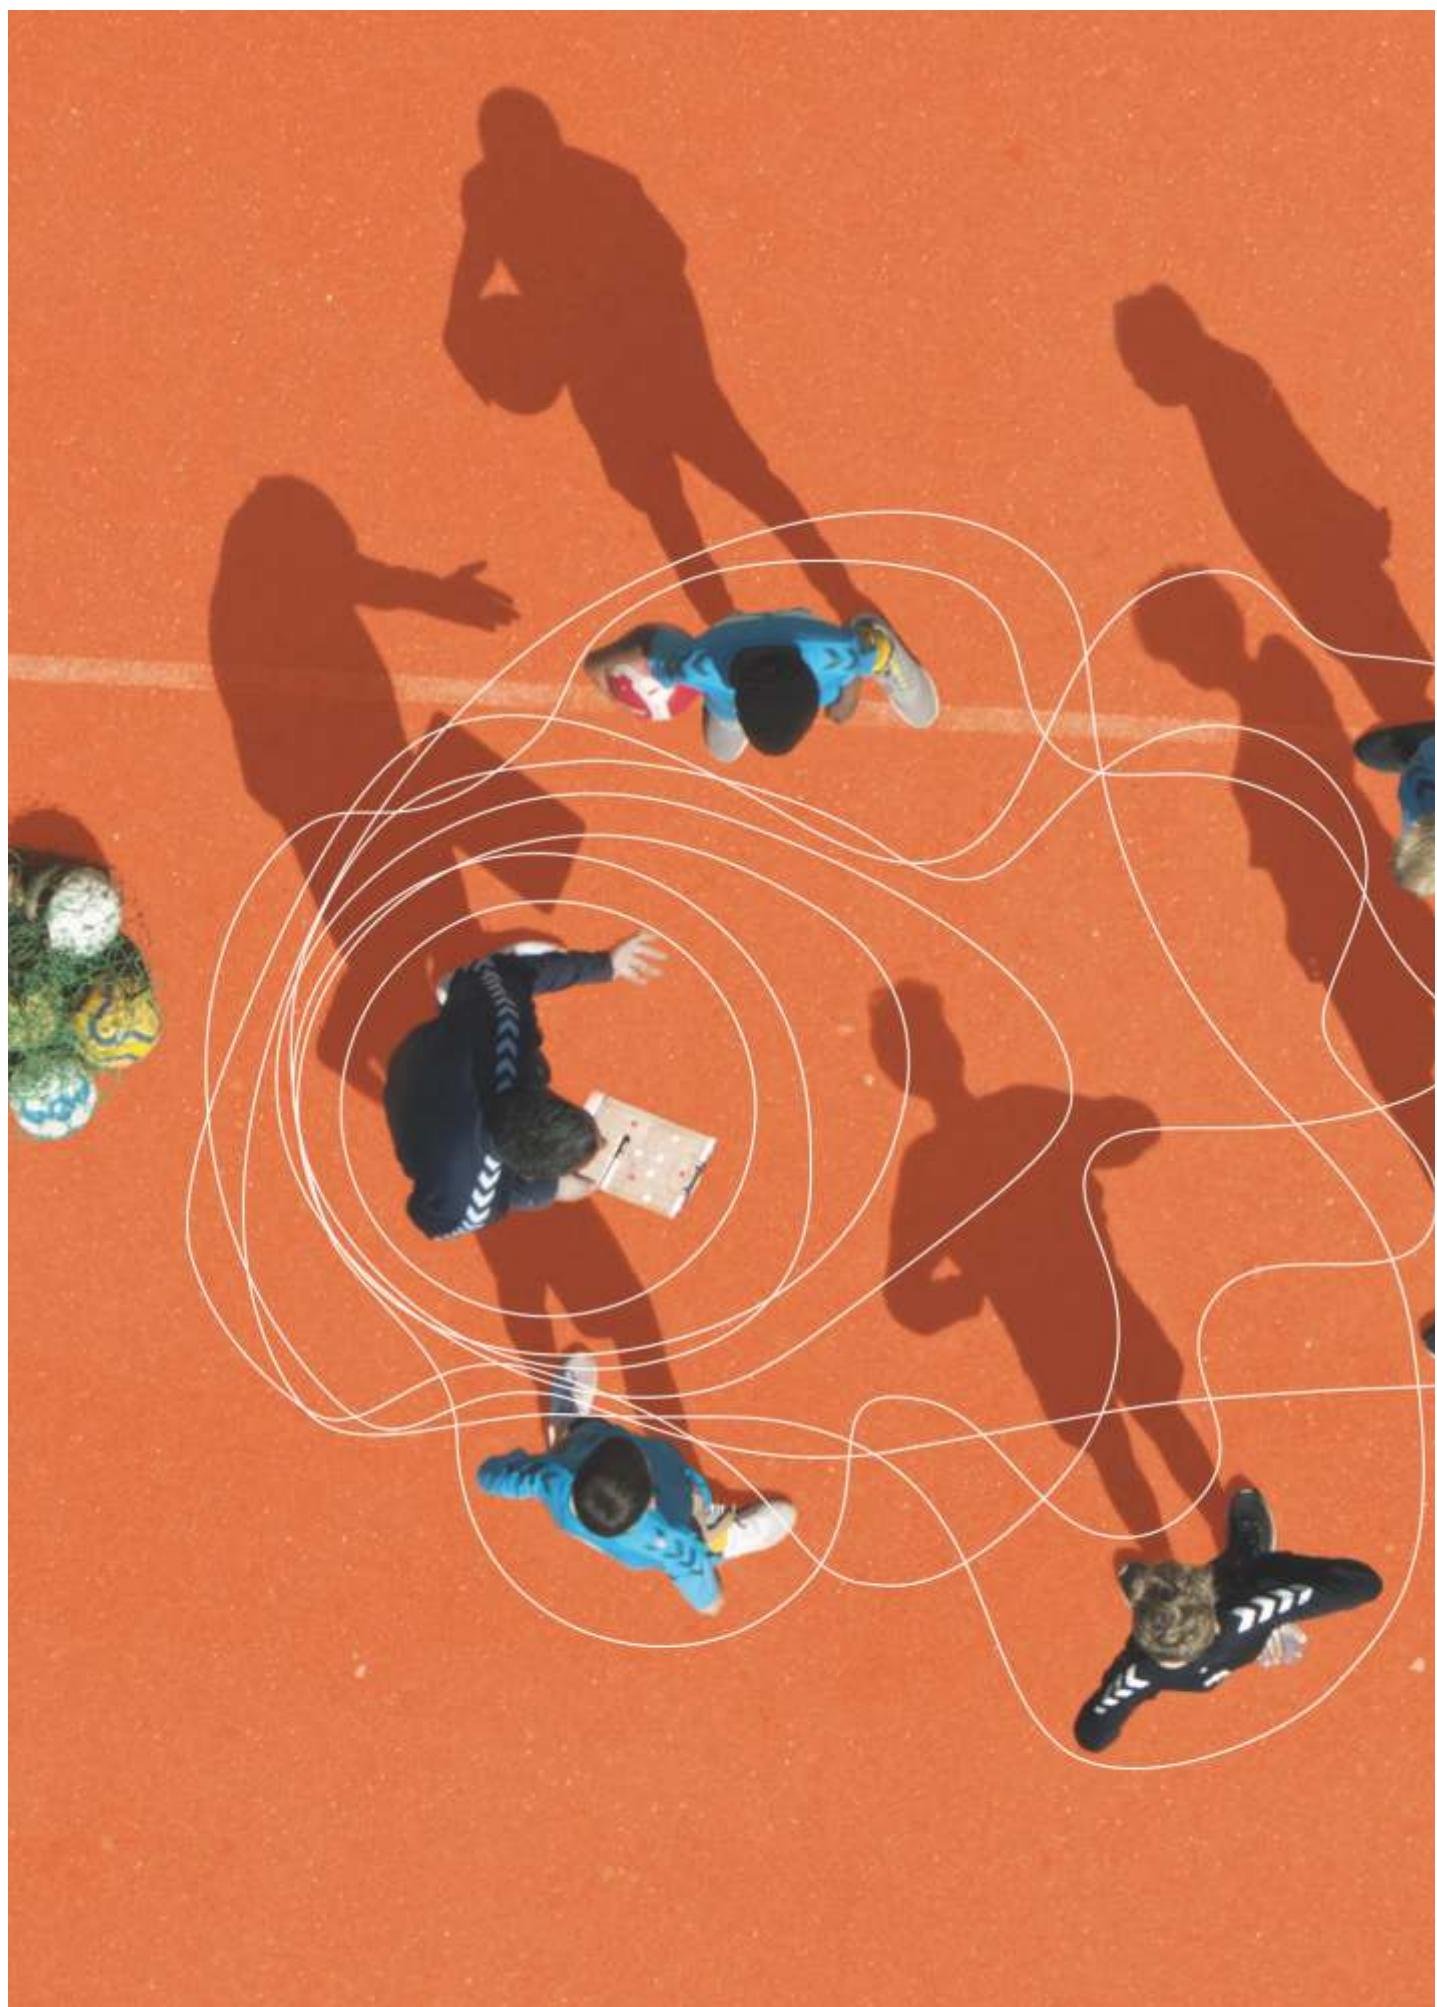

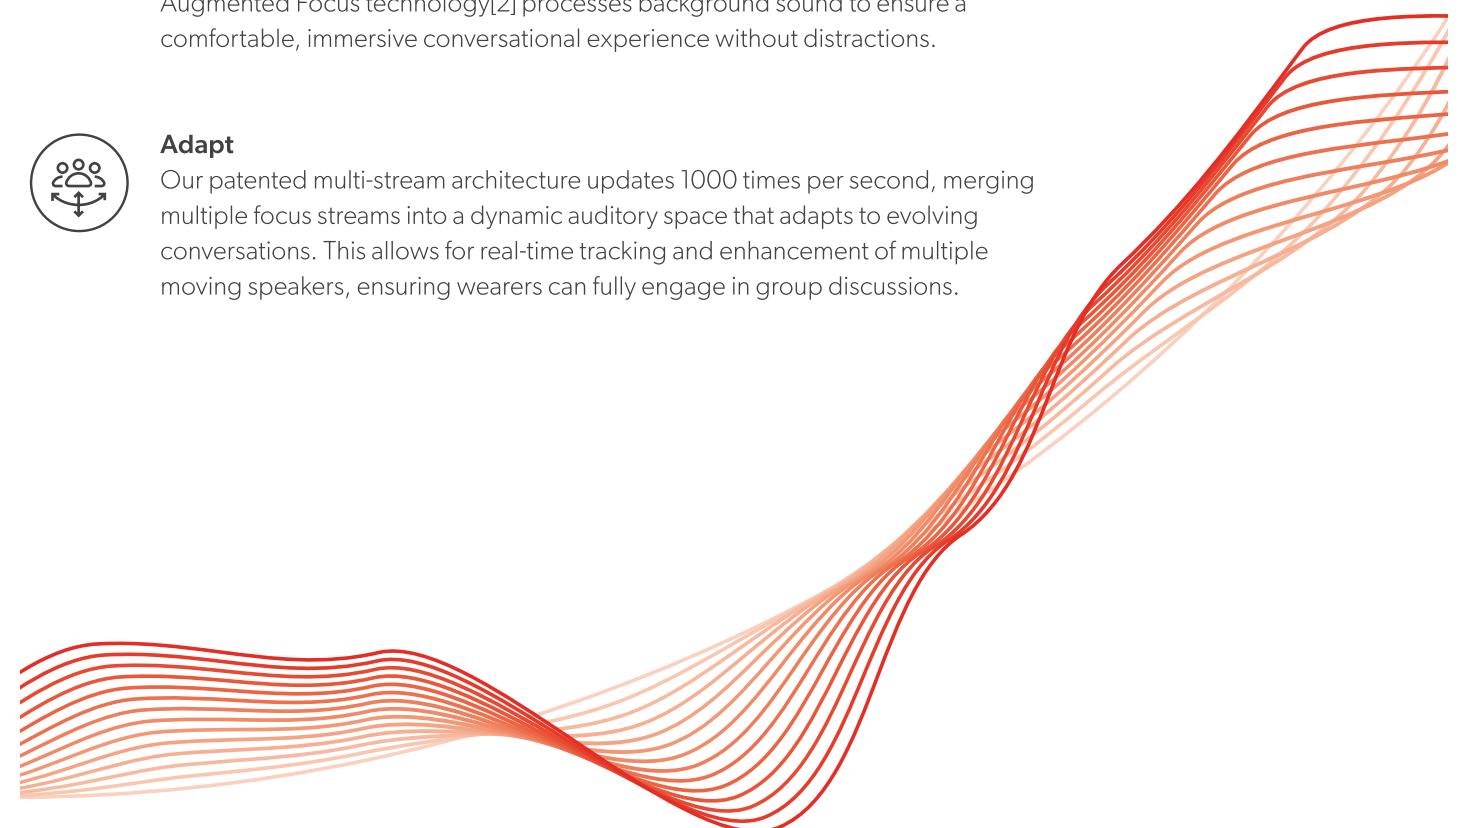

### Augment

Uses data gathered to control multiple focus streams that lock on to and dynamically highlight each speaker's voice amidst the noise. Meanwhile, Augmented Focus technology[2] processes background sound to ensure a comfortable, immersive conversational experience without distractions.

### Adapt

Our patented multi-stream architecture updates 1000 times per second, merging multiple focus streams into a dynamic auditory space that adapts to evolving conversations. This allows for real-time tracking and enhancement of multiple moving speakers, ensuring wearers can fully engage in group discussions.

# Now everyone can connect to the conversation

Introducing Signia Pure Charge&Go BCT IX

Bluetooth®  
Connectivity  
Transformed

With an unprecedented 36 hours of runtime, Pure Charge&Go BCT IX offers the longest battery life and the smallest size\* of any Bluetooth® Classic-compatible hearing aid on the market today. Which means you can stream music, take hands-free calls, and be part of the conversation for longer.

The addition of Pure Charge&Go BCT IX to our pioneering Pure Charge&Go IX family means you can benefit from RealTime Conversation Enhancement, no matter how you choose to connect. This unmatched technology delivers a 22% improvement in speech understanding in a noisy group conversation compared to our closest competitors.<sup>1</sup> So you can contribute to the conversation, no matter how busy it gets.

- **Pure Charge&Go BCT IX** – Connectivity via Bluetooth® Classic without compromising on size, features, or battery life. With telecoil.
- **Pure Charge&Go IX** – Connectivity via MFi, ASHA, or LE Audio.
- **Pure Charge&Go T IX** – Connectivity via MFi, ASHA, or LE Audio. With telecoil.

Features	Information	Performance levels				
		7AX	5AX	3AX	2AX	1AX
<b>Dynamic Soundscape Processing 2.0</b>	Dynamic Soundscape Processing takes sound processing to a more precise level by including motion data for a more realistic sound adapted to everyday life.	.....	.....	.....	...	...
<b>Augmented Focus™</b>	Separates the focus sound (speech) from surroundings, creating a clear contrast between the two, which makes it easier to follow conversations.	✓	✓	✓	✓	✓
<b>Acoustic Sensors</b>	The redesigned acoustic sensors can detect more variables of sound than ever before, providing more accurate information about the environment.	✓	✓	✓	✓	✓
<b>e2e wireless 4.0</b>	Control coupling, synchronization, binaural directionality, eWindscreen binaural, Spatial Speech Focus, CROS/ BiCROS.	✓	✓	✓	✓	✓

## Effortless to use

- Rechargeability for all

Your clients can say goodbye to the hassle of small batteries and hello to rechargeability.

- Wireless fitting

Cumbersome cables are a thing of the past with wireless technology that streamlines the fitting process.

- First fit precision

Our 48 channel first fit calculation ensures a precise and personalized fit from the start, reducing the need for fine-tuning and optimizing the client experience right from the start.

## Elevated design

- Contemporary design

With an attractive premium finish, Orion Charge&Go's design is as sophisticated as its technology.

- IP68 rating

Certified to resist dust and sweat, Orion Charge&Go provides dependable performance in all conditions.

## Enhanced sound processing

- Clarity in quiet

Our TruEar technology emulates the effect of the natural ear shape by prioritizing speech frequencies from the front for optimal hearing support in quiet environments.

- Focus in noise

Adaptive directionality zeros in on the speech your client wants to hear in noisy environments.

- Versatility across soundscapes

Adaptive compression and an extended input dynamic range work in tandem to adjust amplification to the natural flow of sounds, ensuring impeccable sound quality everywhere.

- Contemporary design**  
Sirion Connect combines a premium finish with easy-to-use push buttons.
- IP68 rating**  
Featuring an advanced nanocoating that repels water, Sirion Connect is IP68-certified to resist dust and sweat, even in the most challenging environments.

## Enhanced sound processing

- Split processing**  
We are bringing our advanced sound processing technology to the essentials category. By handling speech and background sound separately, split processing makes speech crisp while keeping ambient sounds comfortable. Proven to enhance speech understanding in busy environments, it lets wearers stay engaged with ease.
- Clarity in quiet**  
Split processing technology prioritizes speech frequencies from the front for crystal clear conversations.
- Focus in noise**  
As it gets louder, split processing ensures that background sound is more aggressively reduced while separately ensuring speech is amplified for greater contrast.
- Versatility across soundscapes**  
Split processing stays on, constantly adapting to the environment to ensure speech can always be heard separately from background sounds.
