

Cosmetic Breast Surgery for Women in Lake Town, Kolkata

What is Cosmetic Breast Surgery?

Cosmetic breast surgery, most commonly breast augmentation, is a procedure designed to enhance breast size and shape. Also known as augmentation mammoplasty, the surgery involves placing implants under the breast tissue or chest muscles.

Many women choose breast augmentation to improve their body image and self-confidence, while others may undergo the procedure as part of breast reconstruction following medical conditions or surgery.

If you're considering breast augmentation, it's important to consult with a qualified plastic surgeon. During your consultation, you'll learn about the procedure, potential risks and complications, and the post-operative care needed for the best results.
